

Importing Points

Before You Start

Step 1

1. Download the points update file. The File will be called:
points.fp7

Remember where on your computer you saved the file

Step 2

1. Open the folder for Mouse Manager 1.1
 - a. Macintosh Users: Mouse Manager will be in your applications folder, or where ever you dragged Mouse Manager to on your Mac.
 - b. Windows Users: The initial setup program that installed Mouse Manager for you put it in your program folder, unless you changed the destination during installation.
2. In this folder you will find 3 folders called: "migrate", "import" and "PointsUpdate". Open the folder called "PointsUpdate"

Step 3

1. Copy or move the file called points.fp7 into the folder called "PointsUpdate "
 - a. Windows Vista users – Please be aware that Vista may handle things a bit differently and you may need to use your administrator privileges when moving files. Copy the files to:
C:\Program Files\Mouse Manager 1.1\import (this may require administrator privileges)

You can alternately copy the files to:

C:\Users\<username>\AppData\Local\VirtualStore\Program Files\Mouse Manager 1.0\PointsUpdate

Step 4

1. Launch Mouse Manager version 1.1. From the Main Menu, click on the "Import Point Tables" button.
 - a. Read the screen that follows and then click the "Import Points" button
 - b. After a second or two you will see a progress bar and Mouse Manager will show how many records have been imported. After that you're done.

Step 5

1. You can now continue working or quit Mouse Manager
2. When you are ready, remember to delete the points.fp7 file from the PointsUpdate folder
